financing your future energy needs

Finance experts at your service

Having made the strategic decision to invest in low Carbon assets Moor Leasing can provide the finance for your project. With over 7 years experience in this fast moving market we are working with leading manufacturers and distributors in the sectors below

Video Teleconferencing

We work closely with some of the leading providers of video conferencing and can finance the complete solution. This typically includes hardware and software support services that are integral to any clients unified communication strategy.

Working together to give you the best results

Some of our Technology Partners – we work with likeminded people who believe that their businesses are making a difference to our environment

Videocall

Videocall is a leading player in the global market of teleconferencing. Their clients believe that lower travel costs combined with the strategic use of video improves ROI (return on investment) and reduces carbon footprint. This makes for a better working environment for their employees and creates real business improvements within their organisations.

Videocall manages the entire solution, enabling you to focus on your business rather than the technology, delivering identifiable value to your business through integration of powerful solutions utilising best in class products, technologies and services.

An independent services company and the largest end-to-end service and solutions provider, with video-enabled collaboration as its core, in the UK. The

company acquired the business assets of Global Video Communications Ltd including the video-conferencing business of Planet Communications and their blue-chip customer-base. Today, Videocall is committed to delivering fully-integrated, best-in-class, real-time collaboration solutions utilising audio, video and web conferencing products and services which deliver the highest possible ROI.

Systems like MyPresence are able to remain productive even when employees are unable to make it to the office. Accessed via an Internet portal and delivering high definition quality video communication anywhere in the world, even using unreliable Internet connections such as mobile 3G networks, MyPresence ensures that organisations are able to remain in constant contact with their employees, customers, suppliers and partners regardless of their location.

Solar PV

We recognise that finance solutions for solar PV are not the same for all customers. If you are in the Public Sector or a Corporate we have the solutions you are looking for.

Solar will become one of the leading forms of Clean Energy for many businesses in the UK. We are so convinced that we are investing in our own 2MW solar field sited in Lincolnshire.

BEBA Energy is an Anglo German business focused on delivering solar PV solutions to the corporate world. They are one of Europe's leading suppliers with an annual installation power rate in excess of 20MW.

BeBa Energy UK

They have a fresh and personal approach with clear values and an excellent understanding of customers needs. An Anglo / German venture focused on selling only high quality products at competitive prices. Installed solar PV in the North of Germany with an annual turnover exceeding €45,000,000.

Beba Energy can design supply and install complete systems that can be used to reduce CO2 emission figures and well as provide long term fixed price energy for the business in the future.

Industrial business sectors have seen property owners and estate managers looking to Solar PV as a means to producing Clean Energy for powering process sectors whilst also looking for a longer term benefit from the UK Feed in Tariff cashback scheme. Installing a Solar PV generator system is a worthwhile commercial investment with a ROI (return on Investment) in most cases exceeding 10%.

Wind Turbines

From a 5KW turbine to a wind farm we can source the solution for your needs. Specialising in business, government and educational installations we have the contacts to get the correct specification turbines for your needs.

Universal Green Energy

Universal Green Energy is a major UK turbine supplier focused on the agricultural sector. They are distributors for both Gaia and Evoco with major expertise in the 10KW to 20KW range. Visit www.ugeltd.co.uk

Evoco

Our technology's ability to 'produce' means we can offer the highest possible performance and financial returns, and the shortest possible payback periods of any small-scale wind turbine.

Evoco's technical edge, gained by perfecting high wind protection systems which allow the use of larger than average rotors for the generator capacity, allows us to maximise generation without maximising costs. Our high performance turbines also lead the way at the cutting edge of design, offering contemporary yet robust aesthetics coupled with supreme build quality.

Confidence in our products enables us to offer a five-year warranty - unbeaten by any other small wind competitor. With 30 years of global trading you can depend on Evoco. Reduce your carbon footprint, reduce your energy bills or create an additional income stream

Understanding your requirements

We specialise in providing both CapX and OpX solutions for our clients. Usually our structures include manufacturers maintenance and other service related products. We use simple to understand documentation and try not to overcomplicate matters. Benefits of working with us include:

Immediate acquisition

Acquire the equipment without waiting for the budget

Total solution

Get all your requirements in one simple package, including hardware, installation, maintenance and services.

Easier budgeting

Fixed monthly instalment keeps you in control of your budget. No more worrying about interest rate changes on variable rate loans.

Preserve working capital

Continue to focus your capital on your most profitable activities, and not depreciating assets.

Fully offset

100% of your lease payments can be offset against taxable profits.

Flexible quote

Get the equipment you need now, at the budget you can afford with a quote tailored to your needs.

Avoid the technology trap

Get the benefit from the latest equipment, without being constrained by owning out-of-date technology.

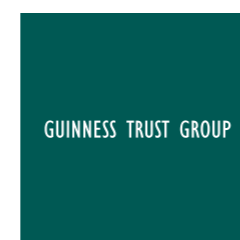

Keeps other credit lines free

Doesn't impact your credit position.

The best for our clients

Our clients all share a common belief that investing in a low carbon future is both good for their business as well as the environment. Whether you are an SME or a multinational we have the solution for your business.

Clients include -

“A complete upgrade of 8 UK sites to provide superior video capability at a lower cost to the client.”

Guinness Trust

“Implementation of a national rollout strategy to all UK offices.”

Mouchel Ltd

“A Sale & Rent Back of existing infrastructure combined with rollout plan for new offices.”

Bovis

FITS and the financial implications

FITS and the financial implications Earlier this year the UK Government introduced the FITs scheme to incentivise small scale, low carbon electricity generation by providing “clean energy cashback” for communities and businesses.

We will be happy to discuss the financial implications of the FIT's scheme with you, but more information can be found on the DECC website by visiting www.decc.gov.uk/en/content/cms/what_we_do/uk_supply/energy_mix/renewable/feedin_tariff/feedin_tariff.aspx
